

1. Design [letterheads](#) using the color combination used by the logo attached below.

Design should be made with Figma.

2. Complete the function to validate email using a regular expression javascript

email-validation.js

```
function ValidateEmail(inputText) {  
  
    #define a regular expression  
    var e_format= "";  
    #write the matching condition in if statement  
    if(){}  
  
    #handel unmatched case here  
    else{}  
  
}
```
